

# Medeco Padlocks

The new Medeco® padlock series is a complete line of premium high security or key control only padlocks that can be master keyed into most existing Medeco<sup>3</sup> key systems using door hardware cylinders. This means Medeco padlocks can share the same key as the facility doors and utilize the same security principles.

These padlocks are available in three distinct body styles: **Weather Resistant, Shrouded Shackle, and Hockey Puck**. The protective shroud on the shrouded shackle model nearly eliminates the risk of having the shackle cut by a bolt cutter. The weather guard protects the padlock, its cylinder and other components from water, dust, and grime. The Hockey Puck is a shackle-less design for the highest level of protection against bolt cutter attacks.

Made of solid brass, the traditional padlock bodies are available in three different styles to accept different door hardware cylinders: knob-style, large format interchangeable core, and small format interchangeable core. The Hockey Puck bodies are constructed of solid steel with a black chrome finish.

### Technical Information:

- ▼ Solid brass body provides strength and protection against forced attacks and outstanding resistance to the elements
- ▼ Boron alloy steel shackle resists cutting and pulling attacks
- ▼ Hardened stainless steel shackles available for enhanced corrosion resistance
- ▼ Thermoplastic body cover and cylinder dust cover on all models resist chemicals, water, heat, and scratching
- ▼ Weather seals around shackle legs prevent dirt, dust, water, and other contaminants from entering the padlock
- ▼ Solid cast iron shackle guard to protect against bolt cutter attacks provides maximum shackle protection on shrouded models. Shrouded models do not include weather seals
- ▼ Standard body padlocks use 6 Pin key-in-knob type cylinders
- ▼ Hockey Puck style padlocks use 5 Pin key-in-knob type cylinders

### Warranty:

Warranted for two years against manufacturing defects. See Medeco Limited Warranty for full details
